5500 Conveniences at the Expense of Communications and Safety

by Neil M. Davis

136 pp. / Paperbound / ISBN 0-931431-04-2

Essential to both pharmacists and technicians for order interpretation, computer order entry, unit-dose cart-filling, and prescription interpretation. This fourth edition has been enlarged from 4200 to 5500 abbreviations, acronyms, and symbols.

"Dr. Davis' book is recommended again because of the extensive number of medical abbreviations, its small size, and its very reasonable price. With its low cost, it is well worth buying each revised issue."
—Journal of the American Association of Medical Transcriptionists

An invaluable aid containing over 7000 possible meanings, it is a must to ensure patient safety.
